# Computational Modeling and Problem Solving in the Networked World

Filesize: 7.2 MB

Reviews

These kinds of pdf is every thing and helped me searching ahead and much more. It generally does not expense an excessive amount of. You wont sense monotony at at any time of your time (that's what catalogs are for regarding should you question me).
(Prof. Angelo Graham)

COMPUTATIONAL MODELING AND PROBLEM SOLVING IN THE NETWORKED WORLD

Book Condition: New. Publisher/Verlag: Springer, Berlin | Interfaces in Computer Science and Operations Research | This book is a compilation of a selected subset of research articles presented at the Eighth INFORMS Computing Society Conference, held in Chandler, Arizona, from January 8 to 10, 2003. The articles in this book represent the diversity and depth of the interface between ORiMS (operations research and the management sciences) and CS/AI (computer science and artificial intelligence). This volume starts with two papers that represent the reflective and integrative thinking that is critical to any scientific discipline. These two articles present philosophical perspectives on computation, covering a variety of traditional and newer methods for modeling, solving, and explaining mathematical models. The next set includes articles that study machine learning and computational heuristics, and is followed by articles that address issues in performance testing of solution algorithms and heuristics. These two sets of papers demonstrate the richness of thought that takes place at the ORiMS and CSI AI interface. The final set of articles demonstrates the usefulness of these and other methods at the interface towards solving problems in the real world, covering e-commerce, workflow, electronic negotiation, music, parallel computation, and telecommunications. The articles in this collection represent the results of cross-fertilization between ORiMS and CSI AI, making possible advances that could have not been achieved in isolation. The continuing aim ofthe INFORMS Computing Society and this research conference is to invigorate and further develop this interface. | Preface. Acknowledgements. I: Perspectives on Communication. 1. A Framework for Integrating Solution Methods. 2. Computational Modeling and Explanation: Opportunities for the Information and Management Sciences. II: Machine Learning and Heuristics. 3. Extreme Optimization: An Evolutionary Local-Search Algorithm. 4. Tabu and Scatter Search for Artificial Neural Networks. 5. A Machine-Learning Approach to Optimal Bid Pricing. III: Algorithm...
